CUSTOMIZED TREATMENTS

Master Massage Therapy

Addressing each client's individual needs, a unique and specialized blend of therapeutic modalities are incorporated, including: neuromuscular/sports/orthopaedic massage, active Isolated stretching and strengthening, myofascial release, Swedish/deep tissue or reflexology. Experience a rejuvenating and sustainable approach to stress or pain relief, and leave with a renewed sense of health and insight for self care.

30/60/90/120 mins

Osteopathic Manual Therapy

Working primarily through the neuromuscular skeletal system, this personalized holistic approach includes myofascial release to relieve pain and motion restrictions, hot stones to bring blood flow, and cupping to release toxins and encourage lymphatic drainage. Stimulating massage and reflexology are used to promote self healing and overall good health. At the end reiki, marma points and a guided healing sound bath will leave you restored and perfectly balanced.

60/90/120 mins

Cupping

This treatment induces relaxing and soothing sensations in the area of the cup. The purpose is to enhance circulation, help relieve pain, remove 'heat', and pull out toxins that linger in body tissue.

60 mins

Reflexology

A natural healing art based on the principle that there are reflexes in the feet, hands and ears which correspond to every part, gland and organ of the body. Through application of pressure on these reflexes, the feet being the primary area of application, reflexology relieves tension, improves circulation and helps promote the natural function of the related areas of the body.

60 mins

Customized Massage

A goal oriented treatment designed to address the specific conditions presented by the client at the time of treatment. Each therapist employs a combination of modalities to achieve improved range of motion, a reduction of pain and stress and enhanced well being.
